

## SAVEETHA SCHOOL OF ENGINEERING

SAVEETHA INSTITUTE OF MEDICAL AND TECHNICAL SCIENCES

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

COURSE CODE : CSA40

Name: Y.Tharun

COURSE NAME : MANAGEMENT INFORMATION SYSTEM

Reg NO: 192110204

6) Draw a Use case diagram to model for a quiz system. A user can request a quiz for the system. The system picks a set of questions from its database, and composes them together to make a quiz. It rates the user's answers and gives hints if the user requests it. In addition to users, we also have helpers who provide questions and hints. And also, administrators who must certify questions to make sure they are not too trivial, and that they are correct

### AIM

To design a **Use Case Diagram** for a **Quiz System**, illustrating interactions between **Users, Helpers, and Administrators** for quiz generation, question validation, and hint management.

Procedure:

#### 1. User Requests a Quiz

- The user initiates a request to take a quiz.

#### 2. Quiz Generation

- The system selects a set of questions from the database and composes a quiz.

#### 3. User Answers Questions

- The user attempts the quiz by providing answers to each question.

#### 4. System Rates Answers

- The system evaluates the user's answers and provides scores.

#### 5. Hint Request (Optional)

- If needed, the user can request hints while answering the questions.

#### 6. Helpers Provide Questions & Hints

- Helpers contribute questions and hints to the system.

#### 7. Administrator Certifies Questions

- The administrator verifies and approves questions to ensure quality.

#### 8. Store Quiz Results

- The system records the user's quiz performance for future reference.

#### 9. Feedback Mechanism

- Users can provide feedback on the quiz quality.

## 10. User Logout

- After completing the quiz, the user logs out.

## OBSERVATION

### Use Case Diagram...

## Result:

The UML Diagram for the Quiz System was successfully created, illustrating interactions between Users, Helpers, and Administrators. The diagram ensures an efficient quiz experience, quality control of questions, and user engagement.
