COURSE CODE : CSA40

Name: Y.Tharun

COURSE NAME : MANAGEMENT INFORMATION SYSTEM

Reg NO: 192110204

8) Describe major services (functionality) provided by a hospital's reception. Summary: Hospital Management System is a large system including several subsystems or modules providing variety of functions. Hospital Reception subsystem or module supports some of the many job duties of hospital receptionist. Receptionist schedules patient's appointments and admission to the hospital, collects information from patient upon patient's arrival and/or by phone. For the patient that will stay in the hospital ("inpatient") she or he should have a bed allotted in a ward. Receptionists might also receive patient's payments, record them in a database and provide receipts, file insurance claims and medical reports.

AIM:

To describe the major services provided by a **Hospital Reception System**, which manages **patient appointments, admissions, billing, and record-keeping** for efficient hospital operations.

Procedure:

1. Patient Appointment Scheduling

- The receptionist schedules patient appointments with doctors and specialists.

2. Patient Registration

- Collects patient details, medical history, and contact information for hospital records.

3. Admission Management

- Assigns beds to inpatients and coordinates with hospital wards for their stay.

4. Emergency Handling

- Quickly registers emergency patients and informs the medical team.

5. Billing and Payment Processing

- Handles patient payments, generates invoices, and provides receipts.

6. Insurance and Medical Reports Management

- Files insurance claims and maintains patient medical records.

7. Discharge Process

- Completes the discharge formalities, updates records, and finalizes billing.

8. Visitor Management

- Maintains visitor records and enforces hospital security policies.

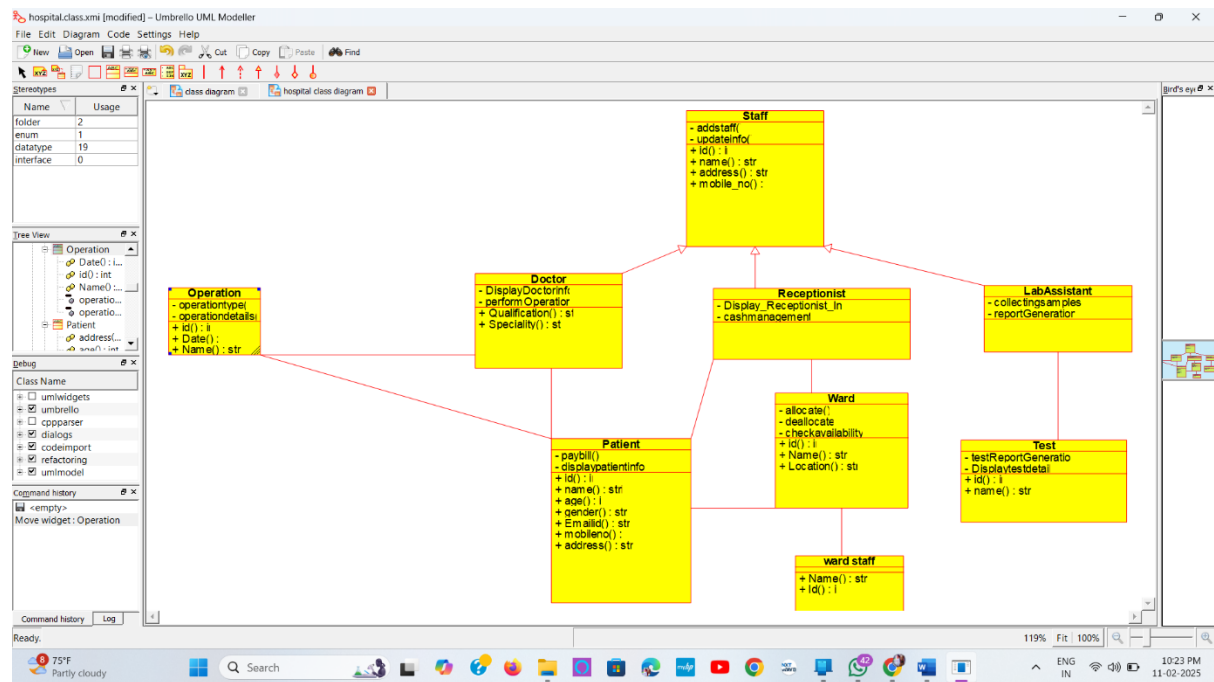

9. Doctor and Staff Coordination

- Communicates patient details and appointment schedules to hospital staff.

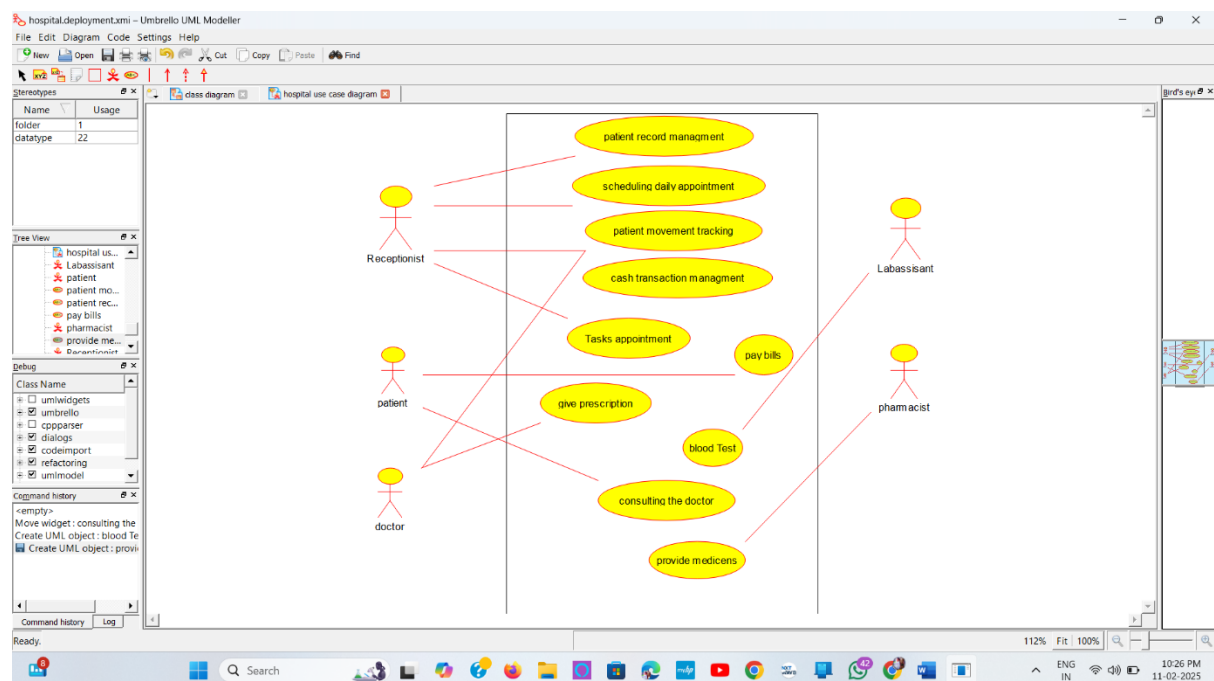

10. Data Storage and Reporting

- Ensures all patient records, transactions, and reports are securely stored and accessible.
